

How to Increase Employee Productivity

| DropTop.™

The way we work is changing. Are you keeping up?

An evolution is underway. A great shift of how and where your employees work and create and contribute. And when it comes to your workforce, whether they operate on a hybrid or fully remote model, their wellbeing is essential.

It's an exciting time, and an opportunity to be on the leading edge of this wave of change by ensuring your people have the very best tools and home office environment to foster a healthy work/life balance, and make their productivity soar.

Are your people equipped to successfully work from home?

Create a dedicated office from very limited space.

Eliminate the clutter and confusion of employees using their kitchen table and laptop for a work space. DropTop.™ will convert a small wall into the perfect work-from-home office.

- Give them the proper tools.

Having a dedicated work space with all the tools they need close at hand will keep your remote workers productive and stress-free.

- Keep the boundaries clear.

Thanks to its unobtrusive design, DropTop.™ is the answer to creating a healthy work/life balance in a busy home.

Are they struggling to be productive?

Having productive employees starts with the basics.

So how efficient can your employees be if their work setup is their laptop on their dining table? This is not sustainable and will lead to discomfort and posture issues.

Productivity starts from within. It is really important that your employees are able to switch off and have a good work life balance. It is far easier to make it a rule that at 18:00 the desk closes out of sight and out of mind, and the living room becomes a living room again than trying to resist reaching to your laptop that's sitting next to the dining table at 22:00.

Can you expect your team to achieve success and be market leaders, when these are their working conditions?

Do you really need a multi-screen setup?

In today's world, multitasking and working efficiently is not optional, it is vital. If your employees haven't got the facilities to do that, they will underperform and/or have to work additional hours to achieve success. This leads to work fatigue, burnout and disengagement.

In 2017, Fujitsu Siemens Computers published a study that analyzed whether multiple monitors boosted productivity. The company found that two monitors increased productivity by 25 percent compared to single-monitor setups. Three monitors increase productivity by 35.5 percent. That's like gaining 3 hours back, out of an 8 hour shift .

HEALTHY HAPPY PRODUCTIVE

- Mental health problems are all too common in the workplace and it is the leading cause of sickness and absence.
- Stress and pressure to achieve are cited as some of the leading causes.
- A staggering 70 million work days are lost each year due to mental health problems in the UK, costing employers approximately £2.4 billion per year.
- That equates to an average 2 days per employee per year. www.mentalhealth.org.uk/

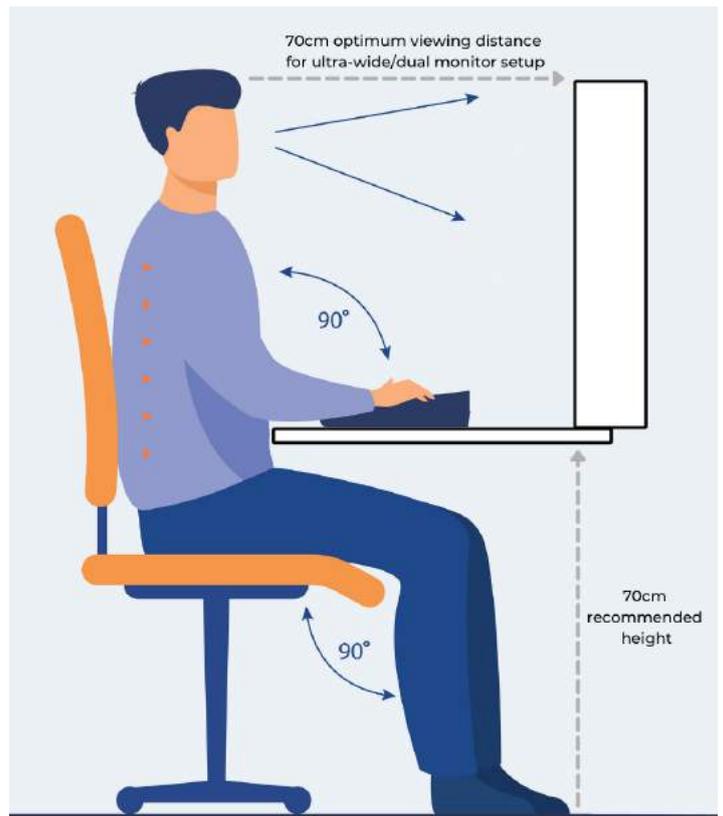

Set up for productivity.

Getting work done is so much easier when you have a setup designed for productivity.

DropTop.™ was made for the modern home. It's wall-mounted folding design not only offers an extra-large desk space but with a massively reduced overall footprint compared to a traditional desk. DropTop.™ wasn't made just to be a space saving desk though, it was built so that everyone can work, ergonomically and efficiently everywhere.

It was designed to be a one click setup. There when you need it, stylishly out of sight when you don't.

DropTop.™ is an ergonomic workstation built for comfortable professional, daily use.

Fully Customisable Design

There's a DropTop.™ for every room.

One size does not fit all.

We know every job requirement and employees needs are different.

DropTop.™ therefore comes in three customisable designs, all featuring our unique and original patent-pending design, encompassing a wall-mounted folding desk with customisable artwork fascia and either space for or pre-installed monitors.

Within each range, we offer up to three sizes, Single, Max and Duo. The Single hosts a widescreen up to 29", perfect for small and tight spaces. The Max offers our biggest single screen option and can house up to a 34" Ultra-Wide screen. The Duo offers our largest display option with two 24" monitors delivering 48" of screen real estate. Various screen resolutions are available in all sizes.
